- Monitoring driver activity from the tracker and producing reports for the MD
- Cleaning and generally maintaining the warehouse and stockroom.

Interests

I love travelling and from 2012 - 2013 I spent 16 months fulfilling a dream with a round-the-world trip where I visited more than 20 countries. During this time I spent 3 months in Bolivia learning Spanish. These experiences taught me about working with different cultures, logistical planning and the different ways in which people celebrate life. I relax by listening to music and watching films and to keep fit I enjoy walking and cycling.
